Is it possible to have an aquarium in zero-gravity? Is it hard to brush your teeth when you're floating? Astronauts, NASA bigwigs, space tourist Dennis Tito, and SpaceShipOne designer Burt Rutan provide the an-

swers to the questions American and Canadian schoolchildren have about space travel. *Kids to Space* would be a great asset to educators about to embark on a space curriculum; the book's 304 pages touch on every facet of space travel conceivable to young minds. Includes a CD-ROM of useful hyperlinks and children's artwork.
