

Book review in September 2004 issue of

Spaceflight

The Magazine of Astronautics and Outer Space
Published by the British Interplanetary Society

Mars: The NASA Mission Reports, Volume 2

Robert Godwin (ed), Apogee Books, 2004, 248pp, £20.95, (US \$28.95), ISBN 1-894959-05-1.

This second volume of Mars reports is one that not only those who purchased volume one will wish to purchase.

As a source of data and illustrative materials it is quite comprehensive and up to date - it includes Beagle 2 files for example.

There are some excellent fold-out panoramas and a double sided DVD. Side one is playable on a

domestic player but side two requires a player or a computer that is DVD ROM capable. The DVD alone is worth the price of the book.

Richard Taylor

“The DVD alone is worth the price of the book.”
