

Book review in March 2006 issue of

Spaceflight

The Magazine of Astronautics and Outer Space

Published by the British Interplanetary Society

Saturn

Alan Lawrie and
Robert Godwin,
Apogee Books,
328 pp, 2005,
£18.95, ISBN 1-
894959-19-4

Apogee Books having finished its mission reports, have started on a new series looking at US launch vehicles. This book is a definitive look at the Saturn V vehicle. It reproduces, in its usual style, notes and reports about the vehicle from concept stage, through its design, manufacture and flight.

The illustrations and pictures are well produced. They have had amazing access to the archives and it shows throughout the book.

For those that remember the power of the Saturn vehicle this book brings home the work which did take men to the moon.

Rex Hall

“This book is a definitive look at the Saturn V vehicle.”

“The illustrations and pictures are well produced.”

“...amazing access to the archives and it shows throughout the book.”
